

Name: Siyanda Nzama

ST NO: 10498929

1. Organisation Overview

StellarRoof Customs is a small automotive customisation business based in Johannesburg. Established in 2024 and specializes in installing fibre optic star light headliners that turn ordinary car interiors into opulent spaces reminiscent of RollsRoyce. Although social media is the company's primary means of operation, it hopes to increase its online visibility by building a formal website.

- Our mission is to provide luxurious and comfortable car interior upgrades that are of the highest calibre.
- Vision: To become one of South Africa's top brands for car customization.
- The target audience: young professionals, auto enthusiasts, and car owners who are interested in luxury car modifications and aesthetic enhancements.

2. Website Goals and Objectives

The main goal of the website is to establish a strong online presence and increase customer conversions.

Specific Goals:

- Generate booking inquiries
- Showcase previous work
- Improve brand credibility
- Provide clear service information

Key Performance Indicators:

- Number of monthly inquiries (contact form submissions)
- Website traffic (visitors per month)
- Conversion rate (visits to bookings)
- Average time spent on the website

3. Current Website Analysis

Currently, StellarRoof Customs does not have a website and relies solely on Instagram for marketing.

Weaknesses:

- Limited reach and discoverability
- Lack of professional credibility

- No central platform for information

Areas for Improvement:

- Create a structured, user-friendly website
- Improve accessibility to services and pricing
- Enhance trust through testimonials and visuals

4. Proposed Website Features and Functionality

The website will include the following key pages and features:

- Homepage
- About Us page
- Contacts
- Gallery/Portfolio showcasing past installations
- Contact/Booking page with form and WhatsApp integration
- Testimonials section

5. Design and User Experience

The website will follow a modern, dark-themed design to reflect a luxury aesthetic.

Colour Scheme: Black, neon blue, and purple

Typography: Clean, modern fonts such as Poppins (headings) and Open Sans (body text)

Layout and Design:

A minimalist, image-focused layout with smooth scrolling and clear navigation.

User Experience Considerations:

- Mobile-first design
- Fast loading speed
- Simple navigation menu
- Clear call-to-action buttons

- Week 2: Wireframes and design
- Week 3: Development
- Week 4: Testing and deployment

8. Budget (Estimated)

- Domain: ±R150/year
- Hosting: ±R100/month
- Development: R3,000–R6,000
- Maintenance: ±R500/month

Reference

1. Methodology: The Design Process

- Phase 1: Identifying the core goals for **StellarRoof Customs** Inquiries, Portfolio, Credibility.
- Phase 2: Mapping out the site structure, ensuring a logical flow from the "Hero" section emotional appeal to the Process section and finally the Quote Form.
- Phase 3: Utilizing Generative AI (**Gemini**) to iterate on multiple wireframe concepts Dashboard vs. E-commerce vs. Service Landing Page to find the best fit for a luxury automotive niche.
- Phase 4: Refining the visuals to include realistic localized data Johannesburgspecific and correcting technical details spelling, UI hierarchy.

2. Citing the Information Source

- **Source/Tooling:** The wireframes and functional mockups for StellarRoof Customs were developed through a collaborative iterative process using **Google Gemini**. The design logic follows Material Design 3.0 standards for components (buttons, forms, and cards) and utilizes localized market data for the Johannesburg automotive sector.
